S&P 500	22.32	20.59	13.40	15.50	10.01

The performance presented represents past performance and is not a guarantee of future results. Total return assumes reinvestment of dividends. Investment return and principal value will vary so that an investor may lose money. For current, quarterly returns, please ask your financial advisor to contact Davis Advisors. Current performance may be higher or lower. The investment strategies described herein are those of Davis Advisors. These materials are being provided for illustrative and informational purposes only. The information contained herein is obtained from multiple sources that are believed to be reliable. However, such information has not been verified, and may be different from the information included in documents and materials created by the sponsor firm in whose investment program a client participates. Some sponsor firms may require that these materials are preceded or accompanied by investment profiles or other documents or materials prepared by such sponsor firms, which will be provided upon a client's request. For additional information, documents and/or materials, please speak to your Financial Advisor. Davis Advisors fee schedules are described in Part 2 of its Form ADV. The strategies herein may not be suitable or appropriate for all investors depending on their specific investment objectives and financial situation. Potential investors should consult with their financial professional before determining whether to invest in a strategy.

This material may be shared with existing and potential clients to provide information concerning market conditions and the investment strategies and techniques used by Davis Advisors to manage its client accounts. Please refer to Davis Advisors Form ADV Part 2 for more information regarding investment strategies, risks, fees, and expenses. Clients should also review other relevant material, including a schedule of investments listing securities held in their account. The performance of mutual funds is included in the Composite.

The performance of the mutual funds and other Davis managed accounts may be materially different. For example, the Davis New York Venture Fund may be significantly larger than another Davis managed account and may be managed with a view toward different client needs and considerations. The differences that may affect investment performance include, but are not limited to: the timing of cash deposits and withdrawals, the possibility that Davis Advisors may not buy or sell a given security on behalf of all clients pursuing similar strategies, the price and timing differences when buying or selling securities, the size of the account, the differences in expenses and other fees, and the clients pursuing similar investment strategies but imposing different investment restrictions. This is not a solicitation to invest in the Davis New York Venture Fund or any other fund.

Returns from inception (April 1, 1969) through December 31, 2001, were calculated from the Davis Large Cap Value Composite (see description below). Returns from January 1, 2002, through the date of this material were calculated from the Large Cap Value (SMA) Composite.

Davis Advisors' Large Cap Value Composite includes all actual, fee-paying, discretionary Large Cap Value investing style institutional accounts, mutual funds, and wrap accounts under management including those accounts no longer managed. Effective January 1, 1998, a minimum account size of \$3,500,000 was established. Accounts below this minimum are deemed not to be representative of the Composite's intended strategy and as such are not included in the Composite. A time-weighted internal rate of return formula is used to calculate performance for the accounts included in the Composite.

Davis Advisors' Large Cap Value (SMA) Composite excludes institutional accounts and mutual funds. Performance shown from January 1, 2002, through December 31, 2010, includes all eligible wrap accounts with a minimum account size of \$3,500,000 from inception date for the first full month of account management and includes closed accounts through the last day of the month prior to the account's closing. For the

performance shown from January 1, 2011, through the date of this material, the Davis Advisors' Large Cap Value SMA Composite includes all eligible wrap accounts with no account minimum from inception date for the first full month of account management and includes closed accounts through the last day of the month prior to the account's closing. The net of fees rate of return formula used by the wrap-fee style accounts is calculated based on a hypothetical 3% maximum wrap fee charged by the wrap account sponsor for all account service, including advisory fees for the period January 1, 2006, and thereafter. For the gross performance results, custodian fees and advisory fees are treated as cash withdrawals. A list of Davis Advisors' Composites is available upon request.

The investment objective of a Davis Large Cap Value account is long-term growth of capital. There can be no assurance that Davis will achieve its objective. Davis Advisors uses the Davis Investment Discipline to invest a client's assets principally in common stocks (including indirect holdings of common stock through depository receipts) issued by large companies with market capitalizations of at least \$10 billion. Historically, the Large-Cap Value strategy has invested a significant portion of its assets in financial services companies and in foreign companies, and may also invest in mid- and

small-capitalization companies. The principal risks are: China risk, common stock risk, depository receipts risk, emerging market risk, fees and expenses risk, financial services risk, focused portfolio risk, foreign country risk, foreign currency risk, headline risk, large-capitalization companies risk, manager risk, mid- and small-capitalization companies risk, and stock market risk. See the ADV Part 2 for a description of these principal risks.

We gather our index data from a combination of reputable sources, including, but not limited to, Lipper, Wilshire, and index websites.

The **S&P 500 Index** is an unmanaged index that covers 500 leading companies and captures approximately 80% coverage of available market capitalization.

The **Russell 1000 Value Index** (R1V) measures the performance of the large-cap value segment of the U.S. equity universe. It includes those Russell 1000 companies with lower price-to-book ratios and lower expected growth values. The Russell 1000 Value Index is constructed to provide a comprehensive and unbiased barometer for the large-cap value segment.
