Selective. Attractive Growth. Undervalued.

What gives us confidence that Davis All-Cap Value SMA (ACC SMA) Portfolio may build wealth for our shareholders in the years and decades to come? The compelling attributes of our businesses.

By being highly selective and rejecting the vast majority of companies in the index, the companies of Davis All-Cap SMA Portfolio have grown more than the index, yet are 38% less expensive. In fact, this gap between price and value is among the widest we have ever seen. We believe this sets the stage for attractive returns in the years ahead.

## Selective

ACC SMA invests in only a select group of well-researched companies

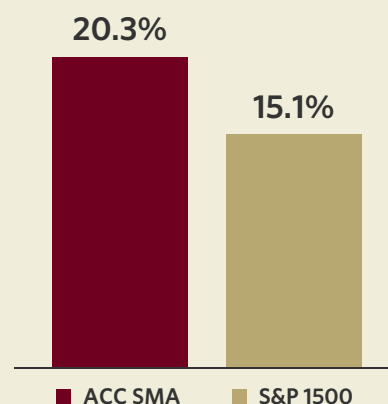

Holdings

## Attractive Growth

ACC SMA portfolio companies have grown more than the index

EPS Growth (5 Year)<sup>1</sup>

## Undervalued

ACC SMA portfolio companies are 38% less expensive than the index

The investment objective of a Davis Multi-Cap Equity account is long-term growth of capital. There can be no assurance that Davis will achieve its objective. Davis Advisors uses the Davis Investment Discipline to invest a client's portfolio principally in common stocks (including indirect holdings of common stock

through depositary receipts). The Multi-Cap Equity strategy may invest in large, medium, or small companies without regard to market capitalization and may invest in issuers in foreign countries, including countries with developed or emerging markets. The principal risks are: common stock risk, depositary receipts risk, emerging markets risk, fees and expenses risk, foreign country risk, foreign currency risk, headline risk, large-capitalization companies risk, manager risk, mid- and small-capitalization companies risk, and stock market risk. See the ADV Part 2 for a description of these principal risks.

We gather our index data from a combination of reputable sources, including, but not limited to, Clearwater Wilshire Atlas, Lipper, and index websites.

The **S&P 1500 Index** is comprised of the S&P 500, MidCap 400, and SmallCap 600, which together represent approximately 90% of the U.S. equity market. Investments cannot be made directly in an index.
